Professional Development Plan

ECE 1100

Please complete all pages of this professional development plan and submit on Canvas.

My name is (First & Last): Kien Le

My major is: Electrical Engineering

Preliminary Thread Choice 1: Circuit Technology

Preliminary Thread Choice 2: Digital Signal Processing

Alternative Thread Choices: Robotics

Goals:

What are your 5-year career goals?

i). To have a couple of internships under my belt related to electrical devices (Samsung, ASML, or Boston Dynamics) where I can apply the skills that I've learn from my circuit tech. In addition, hopefully some signal related projects from these

What are your 10-year career goals?

i). To have a stable full-time offer at either Samsung or ASML

ii).Have had a couple of years worth experience at a Robotics company that would

How do your thread choices support these goals?

Circuit technology is an essential skill for general electrical engineering, and developing a firm foundation as a way to connect what I learn in my courses to the industry's advancement is important towards understanding how these innovations

What information/experiences would help you refine these goals?

Getting an internship where I can develop my practical and technical would contribute towards these goals. In addition, keeping up with the news and how the technology is constantly changing would provide me to read and make connections

For each year at Tech, please note a personal and professional goal that can help you build to your longer-term goals or that you would like to accomplish in general. A minimum of three years of goals is required. If you will be a student for less than that at Tech, please indicate that.

	Personal Goals	**Professional Goals**
Year 1	Begin working on a long-term project that I can keep growing and developing, such a robot that is initially geared towards like a specific task on my desk. I would start just researching, brainstorming, and designing	I would like to connect with professors and other students within classes or extracurricular (like clubs or other activities), so that I can develop connections with other people and learn from them
Year 2	Continue working on the previously mentioned project, developing a working and presentable model that performs the task that it was intended for. Additionally, I can begin experimenting with modularity	I would like to get an internship at a company within a field that I am interested, so that I can learn more about how the industry works within the field and develop technical and practical experience
Year 3	I would like to get involved or begin my own start up, so that I can learn in an intense environment how to troubleshoot, problem solve, and learn. Working through a tough and quick-paced setting would	I would like to continue my internship at the same company, so that I can get a further in-depth experience than just an introductory course. Additionally, I would like to either get into research or be able to break into big

Year 4		
Year 5		

Year-by-Year Planning:

In order to reach the previous goals, list some possible co-curricular, extracurricular, or professional development activities you would like to take part of in the semester you would like to complete it. Please remove the examples when you fill out the table. A minimum of three opportunities is required.

	Fall	**Spring**	**Summer**
Year 1		Join a makerspace	Work/begin a summer project that I can dd to my resume
Year 2	Join a technical/academic club like Hytech or Silicon Jackets	Continue activities at the club, or get a research position under a professor	Get an internship, or some related work to my field
Year 3		Take create-X or get involved within a startup	
Year 4			
Year 5			

Opportunity Details:

Pick three unique opportunities from the table above and fill out the details below. Three opportunities are required to be filled out, but you are not limited to three during your career at Georgia Tech. The difference between co-curricular, extracurricular, and professional development for this assignment are at the end of the document.

Opportunity 1:

What opportunity interests you? (If it is a program list the program name, such as VIP)

Research

Is it a co-curricular, extracurricular, or professional development opportunity?

Co-curricular/Professional Development Opportunity

Why does this interest you?

I want to explore some of my interests within the field more in-depth under someone who has more experience and can push me to learn more.

When do you plan to pursue this opportunity?

I would want a research position during my third or fourth year

Who runs this program? How do you apply? Is there an annual deadline to apply?

The program is dependent on the professor, and I can apply through emailing a professor or by applying to a lab through a link online. The deadline is typically the semester before.

Additional notes:

Opportunity 2:

What opportunity interests you? (If it is a program list the program name, such as VIP)

Create-X/Startup

Is it a co-curricular, extracurricular, or professional development opportunity?

Co-curricular

Why does this interest you?

I want to get involved or attempt to do a startup during my academic period as I will not have much time after a full-time position.

When do you plan to pursue this opportunity?

I would like to pursue this during my third or fourth year/

Who runs this program? How do you apply? Is there an annual deadline to apply?

The create-X program is ran by GT. I can apply through senior design by the course selection with the deadline being the class application date.

Additional notes:

Opportunity 3:

What opportunity interests you? (If it is a program list the program name, such as VIP)

Join a makerspace: the Hive, Invention Studio, or BME makerspace

Is it a co-curricular, extracurricular, or professional development opportunity?

Extracurricular

Why does this interest you?

I want to develop my technical and practical skills, while being able to teach others with the experience that I've had.

When do you plan to pursue this opportunity?

I plan to pursue this early in my first or second year.

Who runs this program? How do you apply? Is there an annual deadline to apply?

The program is usually ran with a group of students and a faculty overhead. I can apply through the links online with the deadline typically being the semester before.

Additional notes:

Co-curricular:

Co-curricular activities are the programs/learning experiences that compliment, extend, or mirror the ECE academic curriculum. These activities might include VIP, ORS, Denning T&M, undergraduate research, etc.

Extracurricular:

Extracurriculars are activities that are external to your course of study including clubs, volunteer positions, intramurals, social fraternity or sorority, service organizations, student government, etc.

Professional Development:

Professional experiences can include co-ops, internships, a wide array of campus jobs, off-campus non-technical jobs, teaching assistantships (UTA), research assistantships, etc.
